

# Price of Vertical Grid Cable Trays

## AI Overview

Grid or wire mesh cable trays typically range from \$15 to \$76 per unit, depending on size, material, and purchase volume. Grid vertical cable trays, also known as wire mesh trays, are available in galvanized steel, stainless steel (304 or 316), and electro-galvanized finishes, which affect durability and cost. For retail or small-scale purchases, prices generally range from \$15 to \$34 per tray, suitable for home offices or small commercial setups. Wholesale or bulk purchases for industrial or construction projects can range from \$0.80 to over \$76 per unit, depending on tray dimensions, material, and supplier.

**Factors Affecting Price**

- Material:** Stainless steel trays are more expensive than galvanized steel due to corrosion resistance and longevity.
- Size and Load Capacity:** Larger trays or those designed to support heavy cable loads cost more.
- Supplier and Purchase Volume:** B2B bulk orders (e.g., from Alibaba or industrial distributors) reduce per-unit cost, while B2C retail purchases are higher.
- Accessories:** Brackets, fasteners, and extensions may add to the total cost.

**Installation and Benefits**

Grid trays allow efficient cable organization, ventilation, and heat dissipation, making them ideal for vertical installations in industrial, commercial, and residential settings. They are modular, allowing extensions, curves, and level changes, which can influence the overall project cost. For accurate pricing, it is recommended to check supplier catalogs such as RS Online, CEF, or GroupSumi, and consider both material type and tray dimensions to match your project requirements.
