

# Price of a four-port fiber optic fusion splice box

## AI Overview

The price of a four-port fiber optic fusion splice terminal box typically ranges from \$15 to \$35, depending on brand, features, and included accessories.

**Pricing Overview**

**Amazon Listings:** A 4-port FTTH fiber distribution box with SC APC coupler adapters, fusion splice tray, and 4 fusion splice tubes is available for around \$20-\$30 per unit, depending on seller and shipping options (Amazon).

**eBay Options:** Similar 4-port FC fiber optic terminal boxes with pigtailed are listed in the \$15-\$25 range, often with free shipping included.

**Specialized Suppliers:** Dedicated fiber optic suppliers, such as TopFiberBox, offer 4-port SC/APC FTTH termination boxes for \$25-\$35, featuring durable ABS plastic enclosures, dual-layer design for fiber management, and support for fusion splicing and termination.

**Key Features Affecting Price**

**Material and Build Quality:** ABS plastic enclosures with dual-layer design provide better protection and cable management, slightly increasing cost.

**Included Accessories:** Fusion splice trays, splice tubes, and adapter ports (SC or LC) can add \$5-\$10 to the base price.

**Indoor vs Outdoor Use:** Weatherproof or outdoor-rated boxes may cost more than standard indoor units.

**Brand and Warranty:** Established brands or products with warranty coverage may be priced higher than generic options.

**Practical Considerations**

Most 4-port boxes support up to 4-core or 8-core fiber splicing, suitable for small residential or office FTTH deployments. Dual-layer design and multiple cable entry points allow efficient fiber management and maintain proper bend radius for optical fibers. Delivery times and shipping costs can affect the final purchase price, especially for international orders. In summary, for a standard four-port fiber optic fusion splice terminal box, expect to pay \$15-\$35, with higher-end models offering better protection, more accessories, and flexible installation options.
