

Price of aluminum composite panel for distribution box cover

AI Overview

Aluminum composite panels for distribution box covers typically range from \$10 to \$25 per square foot, depending on thickness, coating, and supplier.

Pricing Overview The cost of aluminum composite panels (ACPs) varies based on several factors including panel thickness, core material, coating type, and brand. Economical options with thinner panels, simpler coatings, or smaller dimensions are generally cheaper, while premium panels with fire-retardant coatings or specialized finishes cost more. For distribution box covers, panels are usually lightweight but durable, often in the 2–4 mm thickness range, which affects the price.

Supplier Options Wholesale platforms like Alibaba and Made-in-China offer distribution box metal covers at competitive bulk prices, which can be lower than retail. Prices vary depending on the type of cover (indoor/outdoor, metered, switched, or basic) and the quantity purchased. Specialized ACP suppliers such as Premium Bond or Aludecor provide high-quality panels with professional consultation, allowing buyers to select panels optimized for durability, corrosion resistance, and fire safety.

Cost Considerations Thickness and core material: Thicker panels or honeycomb cores increase rigidity and cost. Coating and finish: Powder-coated or fire-retardant finishes add to the price. Quantity and sourcing: Bulk orders reduce per-unit cost, while imported panels may fluctuate with exchange rates. Application: Outdoor or high-performance covers may require corrosion-resistant or UV-stable coatings, slightly increasing cost. For a typical distribution box cover, expect to pay \$10–\$25 per square foot, with wholesale bulk orders potentially lowering the price further. Contacting suppliers directly is recommended to get up-to-date quotes tailored to your specific panel dimensions and coating requirements.
