

Price of cable tray support in Mali

AI Overview

Genuine cable tray supports in Mali typically range from \$5 to \$25 per unit, depending on material, type, and load capacity.

Overview of Cable Tray Supports Cable tray supports, such as GI (Galvanized Iron) C Channels and Z Supports, are essential for securely mounting cable trays in commercial, industrial, and infrastructure projects. They are manufactured from high-grade galvanized iron, providing corrosion resistance, durability, and long-term reliability suitable for both indoor and demanding industrial environments.

Price Factors The price of cable tray supports depends on several factors:

- Material:** Galvanized iron is standard, while stainless steel or coated supports cost more due to higher corrosion resistance.
- Gauge/Thickness:** Supports are available in 14 SWG, 16 SWG, and 18 SWG, with thicker gauges supporting heavier loads and costing more.
- Type:** C Channels and Z Supports differ in design and load-bearing capacity, affecting pricing.
- Supplier and Quantity:** Bulk orders or local suppliers in Mali may offer discounts, while imported supports may include shipping costs.

Estimated Price Range Based on global and regional market data:

- Light-duty supports (18 SWG, standard C or Z type): approximately \$5–\$10 per unit
- Medium-duty supports (16 SWG): approximately \$10–\$15 per unit
- Heavy-duty supports (14 SWG, high-load applications): approximately \$15–\$25 per unit

These prices align with general cable tray pricing trends, where steel supports are typically \$10–\$30 per meter depending on type and coating.

Local Suppliers in Mali

- Brilltech Engineers Pvt. Ltd.:** Offers standard and customized cable tray supports in Mali, catering to industrial and commercial projects.
- VALDINOX and other international suppliers:** Provide wire mesh and metal cable tray systems that can be shipped to Mali, potentially affecting final cost due to import fees.

Tips for Cost Optimization

- Buy in bulk to reduce per-unit cost.
- Select appropriate gauge based on load requirements to avoid overpaying for unnecessary strength.
