

Price of construction site electrical boxes and distribution boxes

AI Overview

Construction site electrical boxes typically range from \$150 to \$1,500, while permanent distribution boxes can cost from \$200 to over \$2,000 depending on specifications and features.

Construction Site Electrical Boxes Construction site or site boxes are temporary electrical enclosures used to supply power safely on building sites, campsites, or trade fairs. They include standard sockets, circuit breakers, differential switches, and often an emergency stop button for safety. Prices vary based on brand, capacity, and features:

- Basic single-phase site boxes: \$150–\$400
- Three-phase or high-capacity site boxes: \$500–\$1,500
- Premium waterproof and dustproof enclosures: higher-end models from brands like Schneider Kaedra or ENERGY METALBOX can cost more due to durability and safety features.

Materials include sheet steel, thermoplastics, or fiberglass, with IP65–IP67 ratings for outdoor use. Pre-wired versions and those with multiple socket types or integrated monitoring may increase the cost.

Distribution Boxes Distribution boxes are permanent electrical enclosures that house circuit breakers, fuses, and switches for residential, commercial, or industrial applications. Pricing depends on:

- Voltage rating and amperage capacity
- Number of circuits
- Material construction (metal vs. thermoplastic)
- Advanced features like smart monitoring, remote control, or energy management

Typical price ranges:

- Residential single-phase units: \$200–\$600
- Commercial or industrial three-phase units: \$800–\$2,000+
- Customized or weather-resistant units: can exceed \$2,500 depending on specifications and integration with building management systems.

Factors Affecting Cost

- Material and durability:** Outdoor-rated, waterproof, or dustproof enclosures cost more.
- Capacity and number of circuits:** More circuits and higher amperage increase price.
- Safety an...**
