

Price of fire-resistant stainless steel cable trays in Ireland

AI Overview

Fire-resistant stainless steel cable trays in Ireland typically range from €50 to €150 per meter, depending on material grade, fire rating, and dimensions. Overview Fire-resistant stainless steel cable trays are designed to maintain structural integrity during fires, protecting electrical and communication systems. They are commonly made from 304 or 316 stainless steel and may feature specialized coatings or intumescent layers to enhance fire resistance. These trays are essential in commercial, industrial, and critical infrastructure projects, including hospitals, data centers, and manufacturing facilities. Pricing Factors Material Grade: 304 stainless steel is standard, while 316 offers higher corrosion resistance, increasing cost. Fire Rating: Trays with a 2-hour fire rating or compliance with standards like ISO 834-1, EN 1363-1, or DIN 4102-12 are more expensive. Dimensions: Widths typically range from 100mm to 900mm, with depths from 50mm to 150mm. Larger trays or higher load capacities increase price. Design Type: Ladder-type, perforated, or solid-bottom trays have different costs, with perforated or modular designs often being more expensive due to manufacturing complexity. Accessories and Installation: Brackets, hangers, and modular connectors add to the total cost. Fire-rated trays may require fewer support points, which can reduce installation expenses. Typical Price Range Standard 304 stainless steel, fire-rated, 3-meter sections: approximately €150–€200 per section (equivalent to €50–€70 per meter) High-grade 316 stainless steel, heavy-duty, fire-rated: up to €450 per 3-meter section (around €150 per meter) Bulk orders or long-term supply agreements may reduce per-meter costs. Sourcing in Ireland Suppliers such as RS Components Ireland and specialized cable tray manufacturers provide stainless steel and fire-rated options. For large projects...
