

Price of protection for small distribution boxes

AI Overview

Small protective distribution boxes typically range from \$10 to \$25 for plastic residential models, with higher prices for metal or industrial-grade boxes. Pricing Overview For residential or small-scale use, plastic distribution boxes with protective features such as IP65 waterproofing and insulated ABS material are generally priced between \$10 and \$25 on platforms like Amazon . These boxes are suitable for indoor and outdoor applications, providing protection against dust, moisture, and minor environmental hazards . For industrial or higher-grade applications, distribution boxes made of steel or aluminum with advanced protection, larger capacity, or brand guarantees (e.g., Schneider Electric, Siemens, ABB) can cost \$40 or more, depending on size, material, and IP rating . Factors Affecting Price Material: Plastic boxes are the most affordable, while aluminum and steel boxes are more expensive due to durability and fire resistance . Protection Rating: Higher IP ratings (e.g., IP65) increase cost because they provide better waterproofing and dustproofing . Size and Capacity: Boxes with more modules or ways (e.g., 12-way vs 5-way) are priced higher due to increased material and complexity . Brand and Certification: Well-known brands with CE compliance or halogen-free materials may charge a premium for quality assurance and after-sales support . Additional Features: Transparent covers, lockable doors, and pre-fabricated cable entries can slightly increase the price . Example Products 12-Way IP65 ABS Plastic Box: \$10-\$25, suitable for home or workshop use, waterproof, insulated, transparent cover for switch monitoring . 5-Module Surface-Mounted IP65 Box: Small ABS box with lockable door, waterproof and dustproof, priced slightly higher due to quality and CE compliance . In summary, for small distribution boxes with protection, expect to pay \$10-\$25 for basic plastic residenti...
