

Price of steel fireproof cable trays in Uzbekistan

AI Overview

Steel fireproof cable trays in Uzbekistan are available from local manufacturers, with prices varying based on size, metal thickness, and order volume, typically requiring direct quotes from suppliers.

Overview Steel cable trays, including fireproof and galvanized options, are widely used in industrial, commercial, and infrastructure projects in Uzbekistan. They provide durable cable management, corrosion resistance, and compliance with safety standards. Common types include perforated trays, ladder trays, C and U-shaped trays, with metal thickness ranging from 0.7 mm to 2.0 mm. Fireproof or coated trays are designed to withstand high temperatures and protect cables in critical installations.

Factors Affecting Price

Tray Type and Size: Ladder trays for heavy-duty power lines are generally more expensive than perforated trays for low-current systems. Widths commonly range from 50 mm to 80 mm.

Metal Thickness: Thicker steel (up to 2 mm) increases load capacity and durability, affecting cost.

Coating and Fireproofing: Galvanized steel, hot-dip galvanizing, or powder-coated finishes for fire resistance add to the price.

Order Volume: Bulk orders often receive discounts, while small quantities may have higher per-unit costs.

Delivery and Installation: Some suppliers offer delivery across Uzbekistan, which may influence total project cost.

Suppliers in Uzbekistan

Mirankul Group: Offers 50 mm and 80 mm metal trays, with direct manufacturer pricing and delivery across Tashkent and other regions.

AYSU HVAC Systems: Produces galvanized and powder-coated trays with thickness from 0.7 to 2.0 mm, suitable for industrial and civil facilities.

Bizkim and Other Local Distributors: Provide a wide range of cable trays with flexible payment and delivery options.

How to Obtain Current Prices Since prices vary depending on specifications and project requirements, it is r...
