

Price of the lower right eccentric elbow for cable trays

AI Overview

The price of a lower right eccentric elbow for cable trays typically ranges from \$1.30 per unit for basic models to higher prices depending on material, size, and standards compliance. Pricing Overview Basic cable tray elbows, including galvanized or stainless steel options, can start at around \$1.30 per unit when purchased in bulk for industrial use, as listed on Alibaba . Prices increase for elbows made from aluminum, FRP, or high-grade stainless steel, or those meeting UL, NEMA, or IEC standards . Specialty fittings like lower right eccentric elbows may also cost more due to their specific geometry and compatibility requirements. Factors Affecting Cost Material: Galvanized steel is generally cheaper than stainless steel or aluminum. FRP (fiber-reinforced plastic) may be used for corrosion resistance in outdoor or chemical environments . Tray Compatibility: Ensure the elbow matches the cable tray type (ladder, perforated, solid bottom, wire mesh) and NEMA class (12B, 20C, etc.), . Size and Bend Radius: Larger elbows or those with specific bend radii for tight installations may increase cost . Compliance and Certification: UL classification, fire resistance, and corrosion standards can add to the price . Quantity and Supplier: Bulk orders reduce unit cost, while single or custom orders may be more expensive. Supplier Guidance Alibaba: Offers bulk pricing starting at \$1.30 per elbow, suitable for standard industrial applications . Graybar and McMaster-Carr: Provide a wide range of elbows with pricing available upon entering your ZIP code, allowing for local shipping and compliance verification . Accio and Atkore: Offer elbows with detailed specifications for load rating, material, and NEMA class, which is useful for selecting the correct lower right eccentric elbow . For an exact price, it is recommended to contact suppliers directly with your required specifications, including material, size,...
