

Price range of Dutch cable tray supports

AI Overview

Cable tray supports in the Netherlands typically range from €10 to €150 per unit, depending on type, material, and load capacity.

Overview of Cable Tray Supports

Cable tray supports are essential for safely installing and organizing electrical wiring in commercial and industrial buildings. Common types include:

Wall Supports: Fixed directly to walls for permanent installations; prices generally start around €10–€30 per unit depending on size and material (steel, galvanized, or stainless steel).

Hanging Supports: Suspended from ceilings or beams; adjustable versions suitable for heavy loads can cost €25–€80 per unit.

Floor Supports: Provide a stable base for cable trays on the floor; designed for heavy loads, typically priced €40–€100.

Right-Angle Supports: Used to secure trays at 90° angles; prices range from €15–€50.

Stair Supports: Specialized for stair installations, supporting additional weight; usually €50–€150 per unit.

Factors Affecting Price

Material: Stainless steel and hot-dip galvanized supports are more expensive than standard steel or plastic-coated options.

Load Capacity: Heavy-duty supports for industrial applications cost more than light-duty supports for office or residential use.

Adjustability and Design: Height-adjustable or modular supports with additional fittings (clamps, brackets, couplers) increase the price.

Brand and Supplier: Leading brands like Legrand, Schneider Electric, and Eurostrut may charge a premium for certified, high-quality products.
