

Qatar Lighting Distribution Box Model

AI Overview

Lighting distribution boxes in Qatar are available in various models, including explosion-proof, wall-mounted, and standard indoor types, with IP ratings from IP30 to IP66, designed for industrial and residential applications.

Types of Lighting Distribution Boxes in Qatar

Explosion-Proof Distribution Boxes: These are engineered for hazardous environments, capable of handling flammable gases or dust. They are typically made from heavy-duty aluminum alloy or stainless steel, with an IP66 rating for dust and water protection. They support voltages up to 415V AC and currents up to 63A per circuit, making them suitable for industrial and outdoor applications in Qatar's harsh climate.

Wall-Mounted Distribution Boxes: These boxes are made from high-quality PC/ABS materials, offering IP54 protection (IP67 on request). They are suitable for both indoor and outdoor use, with high impact resistance, thermal stability, and chemical resistance. Models like the DELTA, STROBL, and ANIF series allow horizontal or vertical combinations for flexible installation.

Standard Indoor Distribution Boxes: Typically made from self-extinguishing polystyrene, these boxes are designed for indoor use with IP30 protection. They are corrosion-free, impact-resistant, and maintenance-free, complying with UL 94V-0 flammability standards and available in RAL 7035 color.

Key Model Indications

IP Rating: Indicates protection against dust and water (IP30, IP54, IP66). Higher IP ratings are recommended for outdoor or industrial environments.

Material: Options include aluminum alloy, stainless steel, PC/ABS, or polystyrene, depending on durability and environmental exposure.

Voltage & Current Capacity: Commonly up to 415V AC and 63A per circuit for industrial models.

Mounting Type: Wall-mounted, floor-mounted, or modular combination units.

Special Features: Explosion-proof design for hazardous zones, UV and chemical resistance, and modular cable entry systems.

Compliance and Local Standards

Distribution boxes in Qatar must comply with KAHRAMAA regulations for...
