

Quote for a 100G SD-WAN device

AI Overview

Pricing for a 100G SD-WAN device typically ranges from \$50,000 to \$150,000 upfront, with additional monthly subscription or service fees depending on features and vendor. Estimated Hardware Costs High-capacity SD-WAN devices, such as 100G appliances, are considered enterprise-grade and designed for data centers or large-scale networks. Based on industry trends, hardware costs for 100G SD-WAN devices can range from \$50,000 to \$150,000, depending on vendor, throughput, and integrated features like SASE, AI traffic optimization, or Zero Touch Provisioning. Subscription and Operational Costs Most SD-WAN solutions are offered as subscription or “as-a-Service” models, which include software licensing, security features, and support. Monthly recurring costs (MRC) vary widely based on bandwidth, number of sites, and service level. For example, premium SD-WAN solutions for high-bandwidth deployments can range from \$500 to \$1,500 per site per month, with additional fees for advanced security or cloud integration. Factors Affecting Pricing Bandwidth Requirements: Higher throughput (100G) significantly increases cost compared to standard 1–10G devices. Deployment Model: On-premises, cloud-based, or hybrid deployments affect both hardware and service fees. Feature Set: Advanced features like application-aware routing, SASE integration, and centralized management tools add to the total cost. Scalability and Redundancy: Dual broadband links, LTE failover, and high availability configurations increase both upfront and ongoing costs. Vendor Considerations Pricing varies significantly between vendors. Leading SD-WAN providers such as Fortinet, Cisco, and VMware offer enterprise-grade 100G devices with modular options, allowing customization based on network size and security requirements. It is recommended to request custom quotes from multiple vendors to compare total cost of ownership, including hardware, licensing, and support. Recommendation For a 100G SD-WAN deployment, plan for: U...
