

Single-mode single-core pigtail extension cable

Overview

Fibreoptic pigtail, singlemode G657A1 900µm with one pre-terminated connector. To be used for splicing on a fibreoptic cable. Halogen-free according to EN 60754-1/2 and flame retardant according to IEC 60332-2-2. Typical applications include data centers, Broadband CATV, Passive Optical Network PON, WDM or DWDM multiplexing, FTTh, and voice services in ATM and SONET. When a fiber optic cable with multiple cores is terminated in a fiber optic enclosure, it is of course convenient that the color coding extends all the way to the coupler in the fiber optic tray. This is why DINTEK has pigtails in its product range with the same color coding as the fibers in a. Pigtail is a short section of fiber-optic cable in the coating, one side factory terminated connector, on the other side exposed fiber. Traditional Fusion Splice-On Connectors with pigtails provide factory-polished performance with field-termination convenience within harsh environments.
