

Slovakian Customs Cost Optical Switch QSFP

AI Overview

QSFP optical switches imported into Slovakia are subject to customs duties based on their HS code 85176290, calculated on the customs value including shipping and related costs. Customs Duty Calculation In Slovakia, imported goods are classified according to the Combined Nomenclature of the EU Common Customs Tariff. QSFP modules fall under HS code 85176290, which covers optical transceivers and similar telecommunications equipment. The import duty is calculated as a percentage of the customs value, which includes the purchase price of the goods plus shipping, insurance, and other costs incurred to bring the goods into the EU. Goods are released into free circulation once customs duties are paid, and temporary warehousing or bonded warehouse options are available if the goods are not immediately cleared. Certain regimes, such as temporary use or processing, may allow partial or full relief from duties if the goods are re-exported or processed within Slovakia. QSFP Module Pricing The cost of QSFP modules varies widely depending on type and vendor. For example, QSFP28 LR4 modules can range from \$280 to \$780 per module depending on whether they are OEM or third-party compatible. Higher-speed modules like QSFP-DD 400G/800G can range from \$1,400 to over \$130,000 depending on reach and technology. These prices are relevant because the customs duty is applied to the total customs value, so higher-cost modules will incur higher import duties. Practical Example If you import 100 QSFP28 LR4 modules at \$280 each, the customs value would be \$28,000 plus shipping and insurance. Assuming a hypothetical import duty rate of 2% (typical for telecommunications equipment, but the exact rate should be verified via TARIC), the customs duty would be approximately \$560, in addition to VAT and any handling fees. Key Considerations All...
