

Suitable fiber optic cables for home wiring

Overview

Selecting the right indoor fiber optic cable involves considering type, specifications, sheath, connection method, price, brand, and future needs. Single-mode is for long-distance, high-bandwidth needs, while multimode is for short-range, cost-effective solutions. Fiber optic cables use light pulses to transmit data within glass or plastic fibers. High-speed transmission: Fiber optic cables support speeds from 1Gbps to 100Gbps or even higher. “Fiber to the home” describes the use of fiber optic cable to deliver broadband internet from a central location directly to private residences. retrofit), installation environment (indoor vs. outdoor), and user density (standard vs.
