

Syria High-Speed Optical Connectivity NRZ

Overview

SilkLink is a national initiative to build a 4,500 km fiber optic cable with a capacity of 100 terabits per second across Syria. It is intended to connect Syrian cities and position Syria as a digital corridor between Asia and Europe, with submarine landing stations in Tartus and. The BARQ NET FTTP initiative represents Syria's comprehensive fiber-to-the-premises infrastructure deployment across all 14 governorates: Damascus, Aleppo, Homs, Latakia, Hama, Tartus, Deir ez-Zor, Ar-Raqqa, Al-Hasakah, Daraa, Idlib, As-Suwayda, Quneitra, and Rif Dimashq. The project, described by the government as a cornerstone of its digital infrastructure. □□ Syria Digital News Update 22. Etihad Salam Telecom (Salam) and Syria's Ministry of Communications &. The Syrian Ministry of Communications announced on Saturday the launch of a new project in cooperation with a U. -based technology company to upgrade the country's aging undersea internet cable, a move that could significantly improve connectivity in the coming months. The initiative, titled. Syria is taking a leap toward digital transformation through a landmark partnership with the Saudi Telecom Company stc Group.
