

Technical Requirements for XL Distribution Boxes

Overview

The XL-21 type low-voltage power distribution cabinet is an indoor fixed enclosed complete set of equipment that complies with IEC 60439-1 and GB 7251. It is specially designed for 50Hz AC power distribution systems with a rated voltage of 380V/660V and a rated current of. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. Designed for indoor wall-mounted installation, it. Robust, Versatile, and Safe Power Control for Demanding Industrial and Commercial Environments The Fulleto XL-21 series is an indoor, floor-standing power distribution cabinet engineered for excellence. It serves as the central hub for receiving and distributing electrical energy in low-voltage. nd removable separable top and bottom for ease of wiring.
