

The middle hole of the distribution box is not aligned

Overview

Stop when the water level touches the “Inner Guide Ring” of the highest Speed Leveler. Rotate all the Speed Levelers until each of the Flo-Holes is aligned just above the water level. Effluent does not flow equally into the outlet pipes. A septic. The dimensions of a septic distribution box can vary based on several factors, including the size of the septic system and the specific requirements of the property. However, there are some standard dimensions that are commonly used: – Width: Typically ranges from 24 to 36 inches. – Length: Usually. Executing the drilling process with proper alignment, even pressure, depth markers, debris clearance, and material securing is crucial for creating perfectly aligned holes.
