

Types of fire-resistant cable trays in Portugal

AI Overview

Popular fireproof cable tray models in Portugal include Cablofil fire-resistant trays for Prysmian FP400/FP600 and Draka Firetuf cables, as well as Flamro FLAMMOTECT-A and DG-CR 0.7 fire protection solutions. Cablofil Fire-Resistant Cable Trays Cablofil offers fireproof cable trays designed for both low and high voltage cables, widely used in construction, power, oil, gas, petrochemical, rail, and utilities sectors in Portugal. These trays are compatible with Prysmian FP (FP400 and FP600) and Draka Firetuf cables and are tested according to the German DIN 4102-12 standard, which evaluates fire resistance for 30, 60, and 90 minutes at temperatures up to 1000°C. Cablofil trays are available in cable basket systems, providing robust protection and ensuring cable functionality during fire events. Accessories such as Ellis Patents Phoenix Cable Cleats are recommended to maintain tray integrity under fire conditions (Cablofil, DIN 4102-12). Flamro Fire Protection Solutions Flamro provides FLAMMOTECT-A fire protection coatings and DG-CR 0.7 fire protection tapes that can be applied to cable trays and individual cables. These solutions are suitable for high-rise buildings, industrial facilities, hospitals, airports, and power stations, offering resistance to flame propagation, UV radiation, salt water, oil, and chemicals. Flamro products are designed to maintain cable functionality during fire, ensuring reliable power and communication in emergency situations. They can be used for both indoor and outdoor installations (Flamro, FLAMMOTECT-A, DG-CR 0.7). Other Cable Tray Options in Portugal While not all are explicitly fireproof, Portuguese suppliers such as GroupSumi and local manufacturers offer a wide range of perforated, PVC, and metal cable trays suitable for industrial and commercial installations. These trays can be combined with fireproof coatings or tapes to meet fire safety requirements. Perforat...
