

Unit Price for 48-core Optical Cable Procurement and Installation

Overview

For 48-core OPGW cables, recent market data (over the past year) shows consistent price clustering between USD \$5.56 per meter, with bulk orders (≥ 10 km) reliably landing near \$6. What matters most isn't chasing the lowest unit price—it's verifying fiber count accuracy. Fiber optic cables are essential components in today's broadband, FTTx, and data center networks. Whether you're planning a national fiber rollout or sourcing cables for enterprise infrastructure, understanding how fiber optic cable pricing works can help you budget more effectively and make better. Several factors influence how much you'll pay for fiber optic cables: Fiber Type and Count: Single-mode fiber typically costs \$0.50 per foot for the cable itself, while multimode fiber ranges from \$0. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination. These fibers are thin strands, often as small as a human hair, that transmit data as pulses of light.
