

Waterproof cable trays in Mali

AI Overview

Effective waterproofing of cable trays in Mali involves selecting corrosion-resistant materials, proper sealing, and adherence to international standards to ensure durability and safety.

Suitable Cable Tray Types for Outdoor Use

For outdoor installations in Mali, ladder-type trays are preferred due to their open design, which allows ventilation and natural drainage, reducing water accumulation. Solid-bottom trays provide better shielding but require meticulous sealing to prevent water ingress. Trough and channel trays can be used in semi-protected areas but are less suitable for fully exposed environments unless heavily modified for waterproofing.

Material Selection

Fiberglass-reinforced plastic (FRP) trays are highly recommended for outdoor use in Mali. FRP trays are non-metallic, corrosion-resistant, UV-stable, and lightweight, making them ideal for harsh climates and high humidity. They do not rust, require no grounding, and offer excellent fire resistance. FRP trays are available in ladder, solid-bottom, perforated, and channel designs, often with matching covers and accessories for complete protection.

Waterproofing Methods

Sealing and Covers: Use GRP or weatherproof covers to prevent rainwater and dust from entering the trays. Solid-bottom trays should be sealed at joints and penetrations.

Wall and Roof Penetrations: For trays entering buildings, employ weatherstop sealing systems or service risers to maintain a waterproof and windproof seal. Upstands and supporting structures may be necessary to ensure structural integrity.

Microclimate Considerations: Account for localized weather variations, such as heavy rainfall, wind, and temperature fluctuations, which can increase condensation or water accumulation.

Compliance and Standards

Ensure that installations comply with IEC standards or other recognized international codes. Proper bonding, grounding, spacing, and material selection are critical to prevent premature failure, corrosion, and electrical hazards.
