

What is the price of a low-voltage distribution box

AI Overview

Low-voltage distribution boxes typically range from \$20 to over \$500 per unit, depending on type, material, features, and order volume. Retail and Online Pricing For standard residential or small commercial units, online retailers like Amazon offer low-voltage panel boxes starting around \$20-\$50 for basic enclosures suitable for home wiring and media setups. These are generally wall-mounted, plastic or metal, and designed for easy installation. Wholesale and Manufacturer Pricing For bulk or industrial orders, factory and distributor pricing varies widely. Low-voltage distribution boxes can be customized with features such as modular busbars, top cable entry, IP-rated enclosures, or OEM branding. Prices per unit decrease with larger orders, but typical industrial units range from \$100 to \$500 or more, depending on specifications, material (metal vs plastic), and smart features. Market Trends Affecting Price Modern low-voltage distribution boxes increasingly include IoT-enabled monitoring, arc-flash detection, and remote communication capabilities, which can raise the average selling price by 8-12% compared to conventional units. Wall-mounted boxes are generally less expensive, while floor-mounted or modular industrial units with higher current ratings cost more. Regional factors, such as North America, Europe, or Asia Pacific, also influence pricing due to manufacturing costs and shipping. Summary Basic residential units: \$20-\$50 Industrial or commercial units: \$100-\$500+ Smart-enabled or customized units: 8-12% higher than standard units Bulk orders: Per-unit cost decreases with volume For precise pricing, especially for custom or bulk orders, contacting manufacturers or distributors directly is recommended to obtain quotes tailored to specifications, delivery timelines, and regional considerations.
