

Which country is the AI server from

Overview

ai is the () for, a in the. It is administered by the. It is a popular with companies and projects related to the industry (AI). 's ad targeting treats.ai as a (gTLD) because "users.

AI Overview

Only 32 countries worldwide host AI-optimized data centers, with the United States and China dominating global AI infrastructure. Global Distribution of AI Servers As of 2025–2026, AI data centers are concentrated in a small number of countries, creating a significant global divide. The United States and China alone operate over 90% of specialized AI data centers, with U.S. tech giants like Amazon, Microsoft, and Google running 87 major AI computing hubs, while China hosts 39, mostly state-driven facilities. Europe has only six major AI data centers, and regions such as Africa, Latin America, and much of Southeast Asia are nearly absent from the AI server map.

Leading Countries by AI Compute Power

- United States:** Leads in total AI compute power, holding 50% of global AI compute capacity and the highest total power capacity at 19.8K megawatts.
- China:** Has the largest number of AI clusters (230–629,000 chips), but trade restrictions limit its overall compute power to seventh globally.
- United Arab Emirates and Saudi Arabia:** Rank surprisingly high in AI compute capacity, reflecting strategic investments in AI infrastructure.
- France:** Second in AI chip ownership with over 989K chips, surpassing China, India, and South Korea.
- Germany:** Despite being an industrial powerhouse, ranks 10th in AI compute capacity.

AI Compute Infrastructure Insights

Public cloud AI compute is distributed across 187 cloud regions in 39 economies, with 101 regions in OECD countries. Only 13 OECD countries host public cloud compute capable of training large-scale AI models, while four additional OECD countries support AI deployment but not large-s...
