

Why is my Xiaomi amplifier constantly disconnecting

Overview

If the prompt signal is not good, it is suggested to change the position of the amplifier and put it in a position not obviously blocked from the main router. Learn how the Xiaomi WiFi Amplifier Pro solved persistent dropouts in multi-room apartments with strong barriers, delivering fast, steady Wi-Fi expansion tailored for real-life challenges. Is my apartment too big for one router, and can the Xiaomi WiFi Amplifier Pro really extend coverage. The AC1200 wifi chip does not appear to support lossless channel switching. If you have a router that has automatic channel optimization, channel width switching or any of the other proprietary names for this kind of technology it will cause packet loss whenever the channel is altered as the. This would be expected if i am the only one experiencing constant wifi disconnects on any wifi router/AP i connect the mi2s to. Can this be hardware related (antenna cable) ?

If this is not the case then (obviously) more people could be experiencing this problem since most here use a variant of. If your Mi WiFi Range Extender AC1200 fails to connect to the network, it can be due to various reasons related to router settings or connection issues. This can prevent the Wi-Fi range extender from establishing a stable link to the Wi-Fi network. It worked well for a few days, but since today morning it keeps disconnecting.
