

Xiaomi 4a Router Directly Connected to Fiber Optic Cable

AI Overview

The Xiaomi Mi Router 4A Gigabit Edition is a dual-band fiber-optic router offering speeds up to 1167 Mbps, wide coverage, and intelligent network management. Key Specifications and Performance The Mi Router 4A Gigabit Edition supports fiber-optic broadband with full-gigabit WAN and LAN ports, enabling network speeds of 100 Mbps and above, making it ideal for high-speed internet connections. It features a dual-core CPU with a clock speed of up to 880 MHz, ensuring smooth performance for multiple devices and high-bandwidth applications. The router operates on dual concurrent bands (2.4 GHz and 5 GHz), providing a combined wireless speed of up to 1167 Mbps. The 2.4 GHz band offers better wall penetration and coverage, while the 5 GHz band delivers higher speeds with reduced interference, suitable for HD streaming and online gaming. Dual-band integration allows both frequencies to appear under a single Wi-Fi name, automatically selecting the optimal band for connected devices. Coverage and Antennas Equipped with four external high-performance antennas, the router ensures robust and stable signal coverage throughout homes or small offices. The antennas are designed to enhance wall penetration and maintain consistent connectivity across multiple rooms. Security and Management The Mi Router 4A provides advanced security features, including WPA-PSK/WPA2-PSK encryption, protecting your network and personal data from unauthorized access. Network management is simplified through the Mi Wi-Fi app, which allows users to monitor connected devices, set up parental controls, create guest networks, and optimize network performance. Design and Usability The router has a compact, minimalist design that blends into any environment, weighing approximately 240 g and allowing flexible placement with a stand. It can function a...
